PARTNERSHIP RESPONSE · JULY 2026

Building the Trusted Pathway

A complementary proposal from Keystone Educations to WeBring — redefining Bangladesh–Korea student mobility through transparency, zero-margin collaboration, and a student-first grant model.

Dismantling the Broker Cartel

- Zero commission sharing — WeBring keeps 100%
- 90,000 BDT student grant over 6 months
- Attendance-linked disbursement
- Seamless D-2 part-time work transition
- University partnership-driven model

SECTION 01

Our Position — Keystone's Mission

Keystone Educations was founded to **dismantle the exploitative broker cartel (Dalal)** that traps Bangladeshi students in debt before they reach Korea. We are rendering the existing model obsolete — by offering a transparent, low-cost, student-first alternative.

We reached out to WeBring because your post-arrival infrastructure represents the most credible settlement platform in Korea. Combined with our pipeline and zero-exploitation economics, we can create an end-to-end pathway where **no one profits from student vulnerability**.

"My goal is to eliminate the monopoly of student agencies in Bangladesh by taking almost no money from the student — and refusing the revenue share so WeBring can operate at maximum capacity."

— Hasibul Munim, Founder, Keystone Educations

Zero Revenue

We decline all commissions. WeBring keeps 100% of university, settlement, and language revenue.

90,000 BDT Grant

Paid over 6 months, conditional on attendance — eliminating financial desperation.

Visa Certainty

Every application passes our audit system before submission.
Near-100% visa success target.

Destroying the Cartel

We are not competing with agencies. We are making their exploitative model irrelevant.

SECTION 02

The Safe-Landing Grant — 90,000 BDT

The primary cause of student dropout is financial desperation upon arrival. Families borrow from brokers, and students arrive already in debt. Our solution eliminates this at the structural level.

KEYSTONE STUDENT GRANT

90,000 ₳

Disbursed monthly over 6 months · 15,000 ₳ per month

Condition: ≥80% attendance

First payment: Day 14 after arrival

Covers: rent, food, transport

Student Journey: Arrival to Self-Sufficiency

- Month 1–3: Arrival & Settlement**
Keystone covers essential costs — housing, insurance, food, transport. Student focuses entirely on settling in and attending classes.
- Month 4–6: Academic Integration**
Grant continues monthly. Student applies for S-3 part-time work permit. Korean language improves.
- Month 6+: Part-Time Work Eligible**
D-2 visa holders can work part-time (up to 25 hrs/week) after 6 months. At ₩10,030/hr minimum wage, a student earns ~₩800k–1M/month — enough for self-sufficiency.
- Month 12+: Full Independence**
Student sustains through part-time work. Grant cycle closes. Visa-compliant, enrolled, self-sufficient.

"A student who is not financially desperate does not disappear. The 90,000 BDT grant is the cheapest dropout insurance the market has ever seen — creating a reliable customer for every service WeBring offers."

SECTION 03

Commercial Terms — Zero Margin Model

We propose a structure that inverts every norm. Where agencies fight for the largest commission split, we decline our share entirely — so WeBring can scale without margin friction.

REVENUE STREAM	WEBRING	KEYSTONE
University Recruitment Commissions	100%	0%
Korea Settlement Services	100%	0%
Language & TOPIK Learning	100%	0%
Career & Internship Placement	100%	0%
Student Counselling Fees (Bangladesh)	0%	Nominal only

What We Ask in Return

- **Visa success across multiple accredited universities** — WeBring collaborates with its university network for smooth admission and visa processing.
- **Active university relationship management** — Keystone has a ready-made master university list with verified admission contacts to accelerate this.
- **Occasional marketing collaboration** in Bangladesh — co-branded sessions, university spotlights, or digital content.
- **Priority access** to WeBring's settlement infrastructure for Keystone students.

The Grant: A Proposal to WeBring

- **Suggest the optimal disbursement mechanism** — Should funds flow through WeBring, a Korean escrow, or a third-party platform? We value your local expertise on Korean financial compliance.
- **Pitch the grant model to Korean universities** as a retention tool. A guaranteed grant tied to attendance directly addresses their retention metrics.
- **Co-design the attendance verification system** — WeBring's team is best positioned to monitor compliance for grant continuation.

SECTION 04

Strategic Rationale — Unbeatable Together

The Market Reality

Bangladesh's study-abroad market is saturated with intermediaries charging 250,000–300,000 BDT+ per student. Students arrive in Korea in debt, creating a predictable trajectory toward dropout and visa violation.

FACTOR	TRADITIONAL AGENCY	KEYSTONE + WEBRING
Student Fee (BDT)	250,000–300,000+	~50,000 (nominal)
Grant to Student	None	90,000 BDT
Post-Arrival Support	None	WeBring full infrastructure
Visa Success Rate	Variable	Audit-guaranteed
Dropout Risk	High	Near-zero
University Relationship	Transactional	Partnership-driven

Low Price + Visa Guarantee = Market Dominance

Keystone offers the lowest legitimate price in Bangladesh. WeBring provides access to multiple accredited universities. No competitor can match both simultaneously.

Expansion Blueprint

JP Japan

Similar visa structures and language requirements. Model translates directly with local settlement partner.

DE Germany

Growing Bangladeshi interest in vocational training. Pipeline + settlement model applies.

CA Canada

Mature market with established settlement needs. Work-study programs are a natural fit.

AU Australia

Large diaspora. Transparent pricing would disrupt existing high-fee channels.

SECTION 05

Operating Model — Clear Responsibilities

FUNCTION	KEYSTONE (BD)	WEBRING (KOREA)
Student Recruitment	Market development, lead generation, counselling	Co-branded materials, university info
University Matching	Student profiling, preference assessment	Portfolio presentation, admission guidance
Document Audit	Collection, verification, Audit System review	Application submission, requirement check
Visa Processing	Standard visa support	University coordination for issuance
Grant Management	Enrollment, eligibility verification	Monthly disbursement, attendance monitoring
Pre-Departure	Language basics, cultural orientation	Entry guidance, arrival checklist
Settlement Services	Introduce & recommend participation	Airport pickup, housing, insurance, mobile, medical interpretation
Ongoing Support	Family communication, escalations	Academic monitoring, life support, career prep
Data Governance	Consent collection (Bangladesh law)	Central data management (WeBring protocols)
University Network	Provides master list with verified contacts	Active relationship management

SECTION 06

D-2 Work Pathway — Part-Time Transition

Korean immigration law permits D-2 visa holders to apply for a part-time work permit (S-3) after completing 6 months of enrollment. Our 6-month grant bridges exactly this gap.

METRIC	DETAIL
Work Permit	S-3 (시간제취업허가) — requires TOPIK level 2+, GPA ≥ 2.0, university recommendation
Hours (Semester)	Up to 25 hrs/week (undergraduate); 30 hrs/week (graduate)
Hours (Break)	Unlimited — full-time work permitted during vacation periods
2026 Minimum Wage	₩10,030/hour (~₩800k–1M/month at 20 hrs/week)
Prohibited Jobs	Entertainment, gambling, adult businesses — all other part-time is permitted

Our grant covers essential costs for the first 6 months — rent, food, transport, insurance — until the student is legally eligible for part-time employment. After that, the student transitions to self-sufficiency while remaining enrolled and visa-compliant.

University Network: Master List

Keystone has compiled a comprehensive database of Korean universities with verified admission office contacts — IEQAS-certified institutions, regional EVisa universities, across bachelor's, master's, and language tracks. This asset is immediately available to WeBring.

Included Institutions

IEQAS-certified, regional EVisa, bachelor's, master's, and language programs across Korea.

Verified Contacts

Direct admission office emails, phone numbers, and departmental contacts.

SECTION 07

Next Steps — Moving to Action

Our proposal is not a counter-negotiation — it is a redefinition of how this partnership should operate. We welcome WeBring's input on every point and are willing to accept any proposal you put forward.

- 1 Confirm Partnership Scope**
Define the exact set of Korea services included in the exclusive partnership.
- 2 Grant Disbursement Design**
WeBring proposes the optimal mechanism for the 90,000 BDT grant. Keystone is open to any structure.
- 3 University Pitch**
WeBring presents the grant + attendance model to partner universities as a retention program.
- 4 Master List Handoff**
Keystone transfers the verified university contact database to WeBring.
- 5 Pilot Cohort Design**
Select target student profiles, universities, and a concrete timeline for the first cohort.

OUR COMMITMENT

Keystone is willing to accept any proposal WeBring puts forward. We are not here to negotiate margins. We are here to build a pathway that makes the existing exploitative model obsolete. WeBring's success is our success.

Let us build the next standard for Bangladesh–Korea student mobility.

From Bangladesh to Korea — A Partnership Built on Trust

Keystone develops the market and builds trust in Bangladesh. WeBring executes student success and long-term support in Korea. Together, we close the gap that has cost too many students their future.
